AAS Degree

Medical Assisting

Program Description

The Peninsula College Associate of Applied Science Medical Assisting program provides training for employment in medical offices, clinics, and other healthcare settings. Graduates are likely to find employment in these areas, while advanced degrees may provide access to a wider range of career opportunities in healthcare. The Medical Assisting AAS degree includes transfer coursework in math, English, psychology, sociology, and chemistry. Courses include medical terminology, anatomy and physiology, clinical skills, medical office administration, electronic medical records, and medical billing and coding. Medical ethics, patient safety, and patient care are taught throughout the program, as well as the rules and regulations mandated by HIPAA and OSHA. Technology skills are integrated to prepare students for medical office employment, including electronic billing and coding, book-keeping and accounting, and charting in patient records. Graduates are eligible to take their national exam in order to obtain their Washington State Department of Health Medical Assistant-Certified credentials.

Application to the program is required. Applicants who plan to begin the program Fall Quarter must submit their application packet by 5:00 pm on June 1st of the preceding Spring Quarter. Please visit www.pencol.edu/medical-assisting to access the application packet. Prospective Medical Assisting students should be aware of the fact that they will have to complete a background check and provide documentation of required immunizations prior to enrolling in medical assisting courses.

Student Learning Outcomes

When this program is completed, the student will be able to:

- Function professionally in a legal and ethical manner as a medical assistant.
- Use medical terminology correctly.
- Effectively communicate with other healthcare team members, patients, and physicians.
- Procure and distribute both office and medical supplies.
- Manage paper and electronic documents in a medical office.
- Demonstrate proficiency with basic medical testing procedures.
- Display knowledge and use of techniques for asepsis, workplace safety, and risk management.
- Demonstrate knowledge and competency in ICD-9 and ICD-10 coding and electronic medical billing of multiple insurances.
- Follow laws and regulations regarding patient privacy and confidentiality.
- Format and generate various documents required in a medical office setting.
- Integrate the cognitive, psychomotor, and affective domain objectives into daily practice.

Program Prerequisites

College-level skills in math and English are required before registering for communications and computation courses at Peninsula College. The placement test will help determine placement level if not known. Medical Assisting program prerequisites ENGL 90 Fundamentals of English, INFO 101 Research in Health and Social Science, and MATH 063/064 Intro to Algebra.

Career Opportunities

The Medical Assisting program provides training for employment in medical offices, clinics, and other healthcare settings. Advanced degrees may provide access to a wider range of health career opportunities. The demand for medical assistants should remain strong over the next several years.

Potential Positions and Earning

Potential positions include medical assistant and medical billing.
