**Notes**
Multimedia Communications - Web Design

Program Description
Multimedia communications and web design technologies are integral components of business, communication, and social media. Professional web designers develop websites, information portals, and interactive solutions for service, data organization, and training. This two-year program prepares students to create accessible web interface designs, database driven websites, and content management system deployment for various business, entrepreneurial, and industry services. Successful completion of this program leads to an Associate of Applied Science Transfer degree in Multimedia Communications. Capstone courses offer a unique opportunity for students to interact with businesses and clients while creating a collective portfolio of student work. Successful completion of this program leads to an Associate of Applied Science Transfer degree in Multimedia Communications. This degree can be completed online. Students are required to have access to Adobe Design Premium software and supply their own digital camera for this degree option.

Special Features
- By working closely with the program advisor and instructors, students have the opportunity to arrange a concentration of classes to meet career goals.
- The program provides up to date curriculum that adapts to the rapidly changing field of multimedia and web technologies.
- This program provides a unique learning environment in its accommodations for the physically challenged.
- The Peninsula College Multimedia program is significantly more cost effective than most private and public schools.

Student Learning Outcomes
When this program is completed, the student will be able to:
- Demonstrate an understanding of the core concepts, terms, tools, and methods used to create websites, web animation, and web based multimedia content.
- Deploy and test web content management systems.
- Create database driven websites.
- Work as a team to apply multimedia competencies and plan, develop, and publish a web site for a client.

Program Prerequisites
Students entering this program should have good computer knowledge and skills to type and operate a computer. Online students should complete HUMDV 101 Online Classroom Success or have successfully completed an online course. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Career Opportunities
The current business climate in Clallam and Jefferson counties is one of active recruitment of new businesses that will emphasize the need for web design skills. This training received from the program will help local businesses establish a web presence that support regional economic development and sustainability.

Potential Positions and Earnings
Potential positions include: multimedia developer, website designer, and web content developer.

For current employment and wage estimates, please visit and search for the relevant occupational term: www.bls.gov/oes

Assessment
College level skills in English and math (eligibility for courses numbered 100 or higher) are recommended before registering for the English, math, or applied math courses required in this program.

Visit the Assessment and Placement Center webpage to learn more: http://www.pencol.edu/placement-testing

Approximate Additional Costs
Books, supplies and miscellaneous fees (per quarter)......................................................... $200.00 - $250.00
