Information Technology - Systems Administration

Year One (Sample schedule)

Quarter One (Fall)
- IT 111 Fundamentals of Information Technology ......................5
- C SC 100 Intro to Computer Science .....................................5
- ENGL& 101 English Composition I ...........................................5

Quarter Two (Winter)
- IT 107 Intro to Networking .........................................................5
- IT 162 Upgrade and Maintain PC ...............................................5
- AMATH 121 Applied Math for Professional & Technical Programs ...5

Quarter Three (Spring)
- IT 114 Database Design and Implementation ...............................5
- IT 156 Introduction to Operating Systems ..................................5
- AOS 170 Business Communications .........................................5

Year Two (Sample schedule)

Quarter Four (Fall)
- ECON 101 Introduction to Economics .......................................5
- IT 225 Windows Domains .........................................................5
- MEDIA 111 Introduction to Multimedia-Web ..............................5

Quarter Five (Winter)
- CSIA 185 Risks Control and Encryption or CSIA 290 Cyber- 
  security Capstone Course .........................................................5
- CS& 141 Computer Science I Java ..............................................5
- IT 260 Unix/Linux System Administration .................................5

Quarter Six (Spring)
- MEDIA 206 PHP/MySQL programming .....................................5
- SOCIAL SCIENCE Elective .........................................................5
- BUS 270 Management Info Systems .........................................5

Total Credits Required 90

Effective Academic Year: 2017-2018 | Last Revised: Winter 2017
Information Technology - Systems Administration

Program Description
The Associate of Applied Science (AAS) degree in Information Technology – Systems Administration, trains students, using industry-based skill standards. Students will design, implement, secure and support Microsoft, Unix/Linux and other industry standard network, client and server systems. Students will learn about the fundamental business context where IT systems function including business communication skills. Additionally, students will receive the training necessary to prepare for certification exams by Microsoft and Comp TIA. Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles of network management and basic a basic understanding of the current information technology business environment.

Program Goals
For the education program to be effective, the curriculum is designed to promote the following outcomes:
• Prepare students for a variety of Information Technology, network support, computer support and business related job opportunities.
• Prepare students for professional certification exams, where applicable.
• Prepare students to communicate effectively with management, including Chief Information Officers (CIO), and Chief Financial Officers (CFO).

Special Features
• This program helps prepare the student for a life-long learning process that accommodates rapidly changing technologies.
• This program can be completed online, or face to face depending on the mode that best fits each student’s needs
• The practice examination used in this program is based on content that follows guidelines established by industry leaders.

Student Learning Outcomes
When this program is completed, the student will be able to:
• Determine the type of software or hardware necessary to complete an objective; understand the functions of different operating systems
• Access information from various storage mediums to locate and provide access to information in subdirectories
• Use an operating system to access a variety of software
• Solve problems using the appropriate operating system utilities; apply systematic approaches and logic to solving problems
• Synthesize and apply information to meet an identified need
• Ask questions and give answers using discipline-specific vocabulary
• Respond to a heterogeneous technology climate
• Plan, install, configure and manage resources. Connect and run applications. Monitor, optimize and troubleshoot network software and hardware.
• Prepare and present departmental budget information in accordance with generally accepted accounting principles.
• Provide management with departmental financial information that assists in the business decision making process.
• Provide organizations a safe, secure, and redundant information system.

Program Prerequisites
Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Career Opportunities
The Information Technology field continues to evolve. Information Technology plays an integral part in achieving management goals and objectives. Network and computer support personnel with experience and education earn living wages that vary depending on many factors, including but not limited to: specific skill set, supply and demand, location, and current business and economic conditions. Job openings vary across the country.

Potential Positions and Earning
Potential positions include Systems Administrator, Systems Support Specialist, and Network Engineer. For current employment and wage estimates, please visit and search for the relevant occupational term: www.bls.gov/oes

For current employment and wage estimates, please visit and search for the relevant occupational term: www.bls.gov/oes

Test Fees
Placement test (one time cost): .................................................. $20.00

Approximate Additional Costs
Books, supplies and miscellaneous fees (per quarter) .................................................. $200.00-$300.00
Optional/Recommended Personal Computer/software .................................................. $1,500.00-$2,500.00
