Program Description

This certificate will provide students with a solid understanding of Adobe Photoshop. Students will learn how to optimize, compress, restore, enhance, colorize, and combine photographs. Courses will emphasize workflow, analysis of image quality, contrast, color, and histogram data. Students will also differentiate between various graphic file formats while designing digital artwork with layer masks and layer styles.

Learning Outcomes

1. Develop skills to professionally enhanced and manipulated photographs for use in graphic design and multimedia projects using Photoshop.
2. Produce informational global issue multimedia presentation and online creative portfolio of digitally edited images that are both educational and artistically inspiring.
